

Content Optimization with Congree

Increase the Quality of Your Texts with Less Effort

Authoring assistance is supposed to do what the name promises, namely to assist authors in the company in their daily work. The software should neither disrupt existing workflows nor constrain the author in his work.

Congree adapts to your mode of operation and provides unobtrusive background assistance in your usual editor. Apart from the possible reuse of existing wording and a comprehensive terminology component, the software features a Language Check that is based on many years of research and innovative technology.

The installation is uncomplicated and enables your technical writers and other authors to quickly get started with Congree. In this way, your enterprise can benefit from the following advantages:

- » Comply with corporate language throughout the enterprise and write more comprehensible texts
- » Benefit from learning effects concerning the spelling, grammar, style, and terminology
- » Reuse sentences, reduce error sources, write texts more efficiently
- » Reduce costs through lower review and translation overhead
- » Adapt Congree to your personal mode of operation to increase the software acceptance

■ Congree Authoring Server

Apart from the spelling and grammar, the rule-based **Language Check** also checks the style. Predefined rule sets cover most application cases; additional company-specific rules can be supplemented as needed.

The connection of third-party components enables access to a wide range of information on terminology hits. The **terminology component** in Congree delivers definitions and usage information on specialized terms – including preferred terms, admitted terms, and deprecated terms.

The **Authoring Memory** serves as a sentence repository, showing you all text segments that are similar to your text and that were written and approved in the past. You can apply these text segments with a click. New sentences are included in the Authoring Memory after they are checked and approved. Congree Data Grooming can help to secure and improve the quality of your Authoring Memory.
